

MUGWANEZA MANZI AUDACE

Software Engineer | Java & Python Developer | Quantum Computing Researcher

Kigali, Rwanda | +250 787 652 137 | mmaudace@gmail.com

[LinkedIn Profile](#) | [Portfolio](#) | [Leetcode](#) | [Codeforces](#)

PROFESSIONAL SUMMARY

Software Engineer driven by the intersection of rigorous logic and high-performance systems. Specialized in **Java** and **Python**, with a focus on building efficient, scalable architectures. Competitive programmer with a strong foundation in Data Structures and Algorithms (DSA), leveraging mathematical precision to solve complex engineering challenges. Currently focused on **Computer Vision**, **Machine Learning**, and **Quantum Computing** research.

TECHNICAL SKILLS

- **Languages:** Java, Python (Advanced), C#, C++, SQL, PHP, JavaScript, Bash
- **Problem Solving:** DSA, Complexity Analysis, Optimization (LeetCode, Codeforces, HackerRank)
- **Backend & Systems:** Multi-threading, Java Collections, MVC, RESTful APIs, Spring Boot, WebSockets
- **Specialized:** Computer Vision (OpenCV, YOLOv8), AI Agents, Quantum Secure Algorithms
- **Tools:** Git/GitHub, Jira, Linux/Unix, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Founder & Lead Developer | Kigali Web Artisans (Kigali, Rwanda)

August 2025 – Present Leading AI research and software development initiatives.

- Developing "Mbaza Ubutabera AI" and conducting vision research manuscripts.

Game Developer | P1 Games (Remote - Canada)

July 2024 – February 2025 * Specialized in level design and lead game design using Unity and C#.

- Contributed to major titles including BugsVsBunnies and RunesVsRobots.

Independent Software Developer | Freelance

March 2020 – March 2024 * Developed various full-stack web and mobile applications for international and local clients.

KEY ENGINEERING PROJECTS & RESEARCH

AI, Research & Security

- **Mbaza Ubutabera AI:** AI-powered legal assistant built with React Native, Laravel, and Python for Kigali Web Artisans.
- **Vision Research Manuscript:** Developing a manuscript for vision research in the Computer Vision domain (2025).
- **Traffic Violation System:** Computer vision project for automated violation detection using FastAPI and YOLOv8 (University of Rwanda).
- **CV Dataset:** Curating and publishing open-source datasets for computer vision models.
- **Checker:** Security operations project involving Windows Forensics and Network Research as a SOC Analyst.

Software & Web Development

- **DormLink:** Student housing locator application built with React, React Native, and Laravel.
- **MBC Hospital Management System:** Enterprise-grade management system focused on data integrity and concurrent user handling using Java MVC.
- **Agakurura Tracker:** Full-stack real-time tracking application integrated with map services.

Game Development Portfolio

- **RunesVsRobots:** Lead Game Designer; strategic combat game requiring complex state management and AI behavior.
- **BugsVsBunnies:** Level Designer; designed interactive environments and mechanics in Unity.
- **License Master:** Team Leader & Designer.
- **NanoCore:** Team Leader & Game Designer.
- **Ikinyoni Bird:** Game Developer.

CERTIFICATIONS & TRAINING

- **Hugging Face Instructors:** Hugging Face Agents Course (2026)
- **IBM Quantum:** Basics of Quantum Information (2025)
- **Microverse:** Full Stack Software Development & Collaborative Engineering (2025)
- **ThinkCyber Israel:** SOC Analyst, Windows Forensics, and Network Research (2024-2025)

EDUCATION

- **B.S. in Computer Science** | University of Rwanda (Expected 2027)
- **A2 in Mathematics, Computer Science & Economics** | GS Mater Dei Nyanza (2019-2022)
- **Ordinary Level Education** | Petit Seminaire St Pie X de Nyundo (2016-2018)
